

Société des Experts Chimistes de France

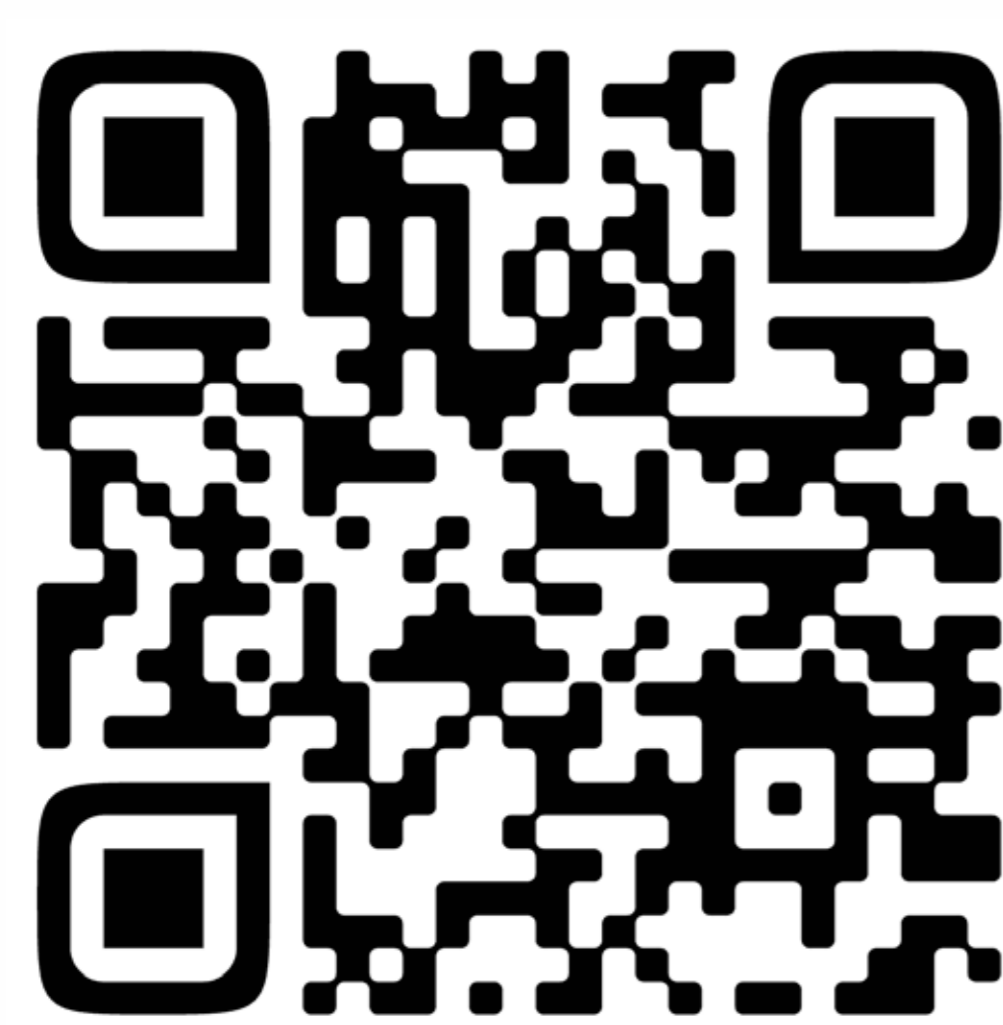

Eco-Chemistry for sustainable products®

Helping business win
by creating environmental value

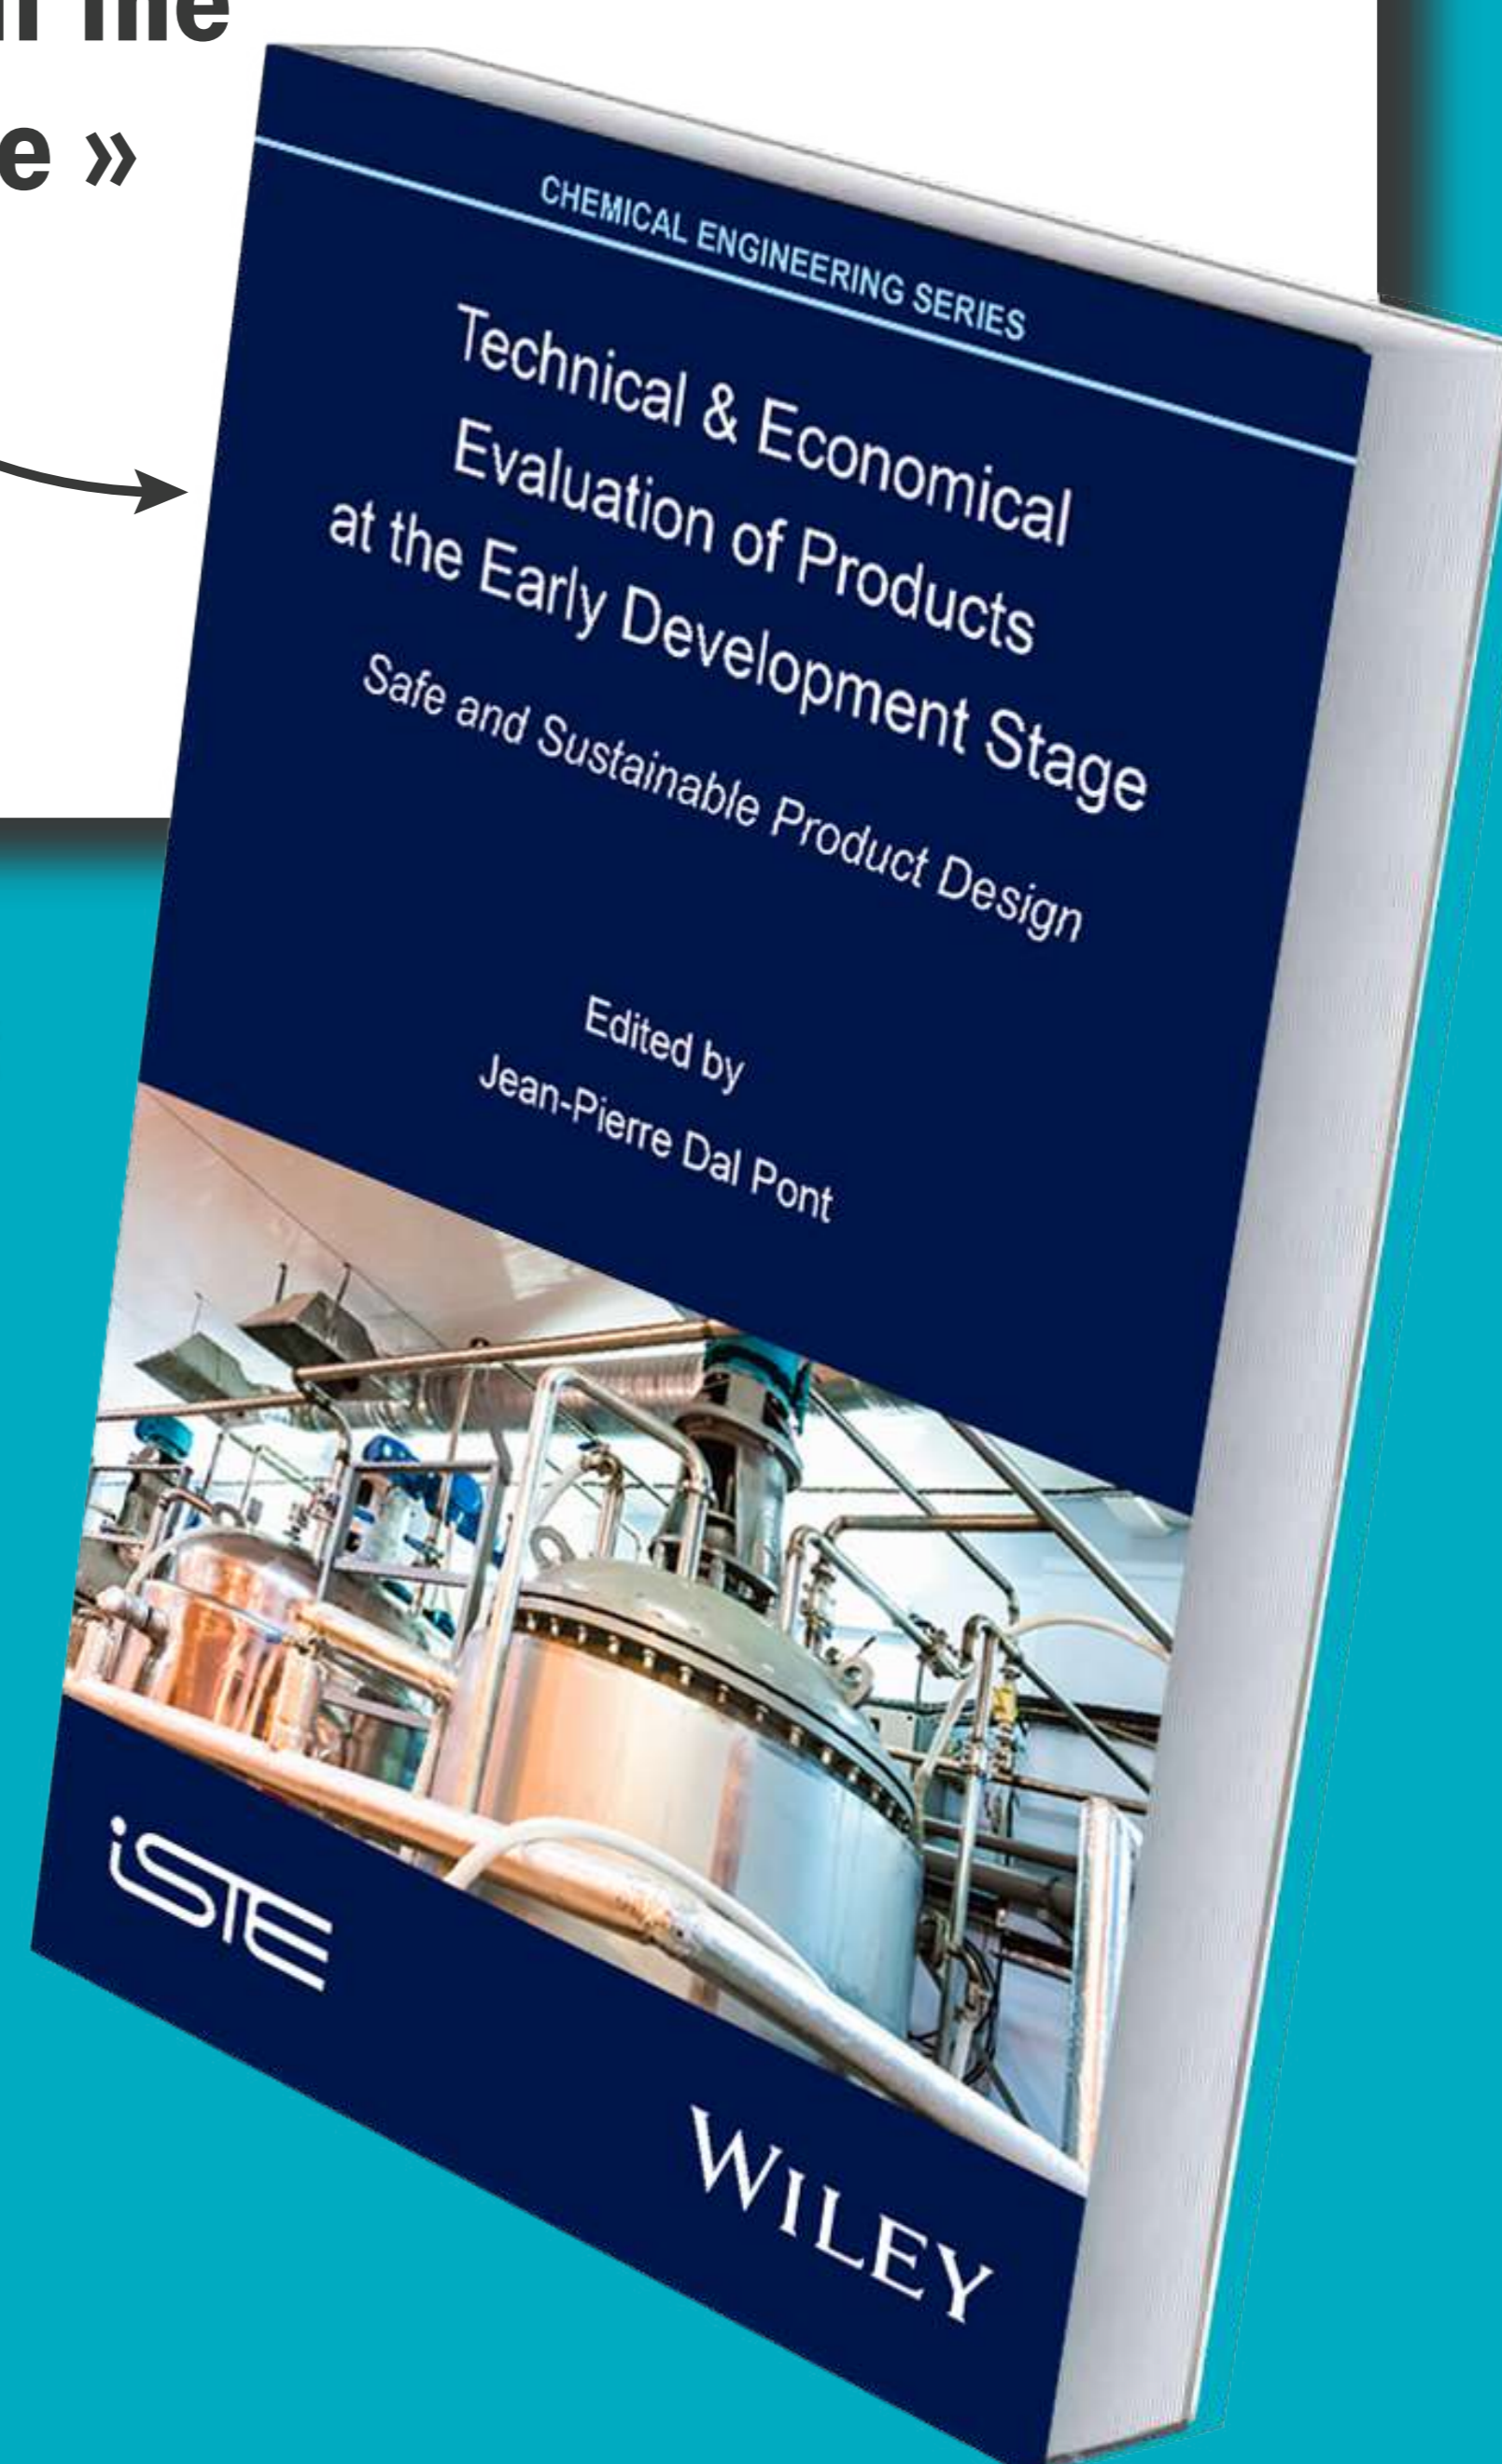

The most recent SECF book
looks at important topics
like the impact on the environment, life cycle assessment,
the circular economy, how products are evaluated,
toxicology and ecotoxicology, and industrial processes.

It is a *must-have* resource for industry pros,
researchers, students, and anyone embracing
green chemistry's fresh approach.

« Technical & Economical
Evaluation of Products at the
Early Development Stage »
